Standard Lengths:	1.2M - 6M Lengths
Recommended Joist Spacing:	400mm CTC

The Affordable Excellence in Timber

Finger jointed Garapa offers an economical and practical solution for those seeking the unmatched durability and timeless beauty of South American hardwood.

This exceptional timber, known for its remarkable resilience and ease of use, has taken a step further by being meticulously crafted from shorter pieces through finger jointing techniques which would otherwise be discarded or destroyed. Garapa's distinctive golden-yellow brown hue, which gracefully weathers to a silvery grey over time, sets it apart as a premier choice for both aesthetic and functional purposes.

specifications

Bonding Type:	Finger Jointed
Glue Type:	GP/ Adhesive for exterior use
Bonding Pressure:	183 kg/cm ²
Usage:	Structural & Load Bearing
Environmental Rating:	Formaldehyde Free

benefits & features

- Exotic Hardwood Timber
- Class 1 Rating
- Sustainably Sourced
- High Durability
- Highly Resistant - Rot/ Insect Attacks
- Easy Workability

Stocked Range

High-strength , great value hardwood with unique colouring tones .

Often referred to as “Brazilian Cherry” Jatoba only resembles Cherry it in a similar attractive colouration. Jatoba is a craftsman’s dream with how it responds to glues, stains and even steam-bending, but more technically difficult with tool working due to its density, interlocking grain, and hardness. Jatoba has proven itself overtime and still does.

Recommended Joist Spacing:	400mm CTC

Tiger wood

Strength, hardness, durability - the hallmarks of great hardwood.

Tigerwood, a name that mirrors its appearance with a rich reddish-brown foundation and captivating streaks of dark brown to black. This hardwood boasts an impressive combination of characteristics, including its innate resistance to moisture absorption. While this attribute makes it an outstanding choice for decking and cladding, it does present challenges when it comes to adhesive applications.

Tigerwood *Astronium spp* specifications

Origin:	Mexico southward to Brazil
Average Dried Weight:	905 kg/m ³

A hardwood that will endure with superior strength

Apart from Verdolago's uniform, fine grain texture, its next best quality is its superior strength, making it great to use for structure and deck outdoors. Verdolago looks similar to the world-renowned Ipe Timber but with a lesser resistance to certain insects.

Verdolago will big lustre and strength to your outdoor deck
